In order to determine these factors it would be necessary for congress to have at their disposal an enormous amount of information relating to the cost of production of all articles affected by the tariff in the United States, the price at which such articles can be brought into the United States, and their costs in foreign markets.

I believe that the plank which was incorporated in the republican platform, that tariff rates should be based on the difference in the cost of proform, that tariff rates should be based on the difference in the cost of production in the United States and foreign countries, was wrong and undesirable to obtain in foreign countries the cost of production, such things being guarded with the greatest lealousy. In order that a Tariff Commission may do effective work, it is necessary that it be of a continuing character, not subject to flurries of excitement. For that reason it is desirable that the terms of service be of reasonable length, and that the appropriation under which it operates be of a continuing character. It is very much easier to block an item in an appropriation bill than to do almost any other act of congress, and a Tariff Commission which depends for its existence upon having an appropriation made for it each session of congress is sure to meet with an upset in a comparatively short time. FRENCH BATTLEFIELDS Rev. George T. Berry Addressed Special Meeting of Norwich McCall

A special meeting of the Norwich McAll auxiliary was held in the Osgood Memorial on Thursday afternoon and was conducted by the president Mrs. Leonard W. Bacon. It was open ed with responsive readings, prayer by Rev. Dr. S. H. Howe and the singing

of a hymn. The usual reports were given by the secretary and treasurer.

The real purpose of the meeting was to hear the address by Rev. George T. Berry, field secretary of the natio society, who brought the latest reports from the battlefields in France and from the annual meeting at Elizabeth, N. J. This auxiliary was repaid for its past year's efforts in the grateful letters of thanks which come from over the sea. In the early days of the wart there was a strong feeling in France against the indifference shown by the United States towards the principles which this country professes. They thought we were ungrateful for the 772 thought we were ungrateful for the 772 million dollars and the many soldiers which France gave to us during the which France gave to us during the American Revolution. But the gifts and sympathy of the people in America, independent of the government, have made them come to realize that we are with them in spirit—90 per cent. of us. It would be dreadful for America to lose the love of France.
